DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 10, 2008 has been entered.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 and 9-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al., 6,723,445 B2.

Li teaches light emitting devices comprising a quinoxaline derivative of the type contemplated by applicants, per claims 1-4, 9, and 12-14. See Figures 9, 24 and 25 and columns 12-15. The light emission can be excited from a triplet state and has a peak within the instant claimed limit, as required by present claims 10-11. Regarding claims 15-17, it is well known in this to form electronic devices as claimed or to use in a semiconductor device. Accordingly, these limitations are not construed to be a matter of invention in the absence of factual evidence to the contrary.

No claims are allowed.
